

Panasonic CA Plug-in

Polty's Inc.
Unified Communications Solutions

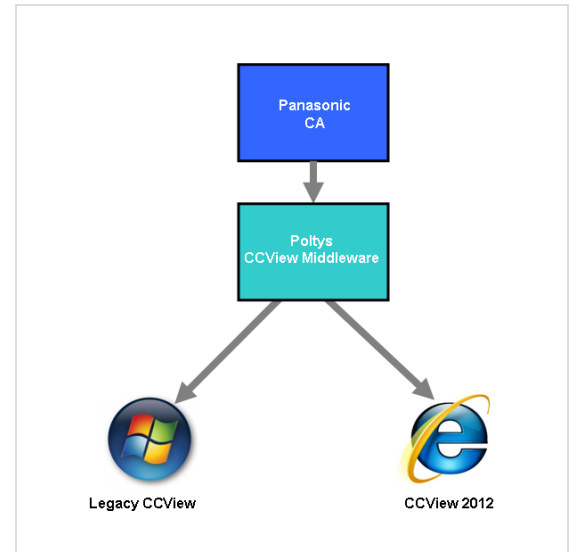

► Overview

Polty's **CCView Middleware** product allows Panasonic Communications Assistant (CA) executing either legacy CCView or CCView 2012 WEB-based version by using a middleware wrapper application.

CCView Middleware and CA must be installed on the same PC in order for CA to launch the execution of CCView.

► Key Features

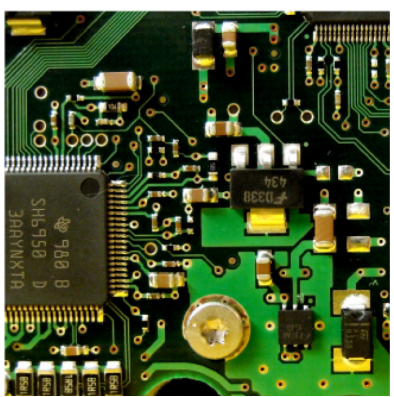

- When CCView Middleware is installed, the installation wizard registers a special Windows Registry key for Panasonic CA usage.
- Panasonic CA finds the registry key on specified position and it executes CCView Middleware by shell command using the value specified in the Windows Registry key
- CCView Middleware starts the execution of either legacy CCView or CCView 2012 WEB-based edition.

Benefits

- Complements Panasonic CA features by adding monitoring and reporting functionality
- Enhance the visibility of business telephony infrastructure
- Increase business productivity

System Requirements

- Intel® Pentium IV at 1.4 GHz, 512 MB RAM, 40 GB free HDD space, 100BaseT NIC
- Microsoft Windows XP Professional SP3, Microsoft Windows Vista Business SP2 (UAC disabled), Microsoft Windows Server 2008 R2 SP1 (UAC disabled), Microsoft Windows 7 Professional (UAC disabled)
